

TECHNICAL CARD**WHEEL RIM CLEANER RED**

Preparation for removing difficult organic dirt from glass, varnished, rubber and plastic surfaces.

SUBSOIL

- ◆ Glass surfaces.
- ◆ Plastics.
- ◆ Lacquer coatings.
- ◆ Rubber surfaces.

HOW TO USE

Make sure the rim is cool before use. Spray the dirty surface evenly. Wait 90 seconds after applying the product. During this time, the preparation will turn a bloody color. Do not allow the product to dry on the cleaned surface. A delicate brush or sponge can be used for stubborn dirt. In the case of slightly dirty rims, the effect may not occur. Rinse the rims with high-pressure water.

NOTE: The product has a very strong smell. Store upright. Do not keep in the car.

THE STORAGE CONDITIONS

Store in a dark and cool place, away from sources of fire and heat. The shelf life of the product in its original packaging when stored at 20°C is 60 months.

HEALTH AND SAFETY REGULATIONS

Comply with the Material Safety Data Sheet for the given product.
